PUBLIC COMMENT

Mayor Cordova asked if there is anyone with a public comment.

Paul Baca, addressed the Mayor and Councilors regarding the new truck stop to be developed in Belen. His concerns were there has not been any public comment or public meetings concerning the signage for Love's Travel Stop. Mr. Baca states that when he was developing his business (Young Baca 66) he had to come before Planning and Zoning and the Council to have a variance on the sign because the sign is higher than the city ordinance reads. A public meeting was then held and neighbors who were in protest because of the sign, attended the meeting. Mr. Baca would like there to be a public meeting for comment concerning the new developers. Mr. Baca stated that he had obtained a copy of the Impact study that Love's performed and he is concerned that the study is being adopted but he also states that he has not seen a study by MRCOG or DOT (Department of Transportation). Mayor Cordova asked Steve Tomita with Planning and

Zoning if there had been any impact studies done with MRCOG or DOT. Mr. Tomita said that they did not recommend a light at this time. Money is being collected and Molzen Corbin will be making the recommendation from Love's towards that light, also to include the upcoming development. Love's is building a deceleration right turn lane coming from the freeway turning onto Christopher road. Mayor Cordova asked "Just to clarify who is paying for the improvements?" "Love's" answers Mr. Tomita. Mayor Cordova advised Mr. Baca that the city ordinance for signage has since been changed to allow higher signage there for Love's did not have to come for a variance.

Chris Chavez, general contractor from the area, is concerned that the Love's Travel Stop has not sent any representatives to present before the City Council nor have they scheduled a public hearing to address the pros and cons in which it will impact our city and its traffic and that a four way stop which will be created at Camino Del llano will create congestion. A traffic study put out by Love's suggest no adverse impact because of the low traffic counts at the present and also for the future. He says that Love's has been allowed to install a 90 foot sign for advertisement. The more the company advertises the more the traffic will increase therefore contradicting the traffic study. He and other business owners would like to ask the City of Belen to require Love's Travel Stop to put in a traffic signal at this intersection. He worries that the citizens of Belen will be the ones paying for this traffic signal and asked that this be put to a vote.
