

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring and Reporting Requirements Not Met for
Belen Water System

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda.

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what we did to correct these situations.

The Belen Water System water system did not report disinfectant residuals collected from distribution during the 1st quarter of 2022 (February & March).

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the above quarter we did not complete all monitoring or testing for disinfectant residuals and therefore cannot be sure of the quality of your drinking water during that time.

Additionally, we are required to submit monitoring data to the state for the various drinking water standards. Belen Water System water system is required to submit a report of the monthly disinfectant residuals on a quarterly basis to the New Mexico Environment Department Drinking Water Bureau (NMED DWB). Belen Water System water system did not meet the monitoring and reporting requirements for this drinking water regulation. This resulted in a violation.

What should you do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What happened? What is being done?

Belen Water System water system will submit a report of the precise disinfectant residuals to the NMED DWB by the specified date outlined in the drinking water regulations. We returned to compliance on 4/12/2022
